serted that British officers who had been sent to Hungary and Austria had purchased broken down animals at extravagant prices and divided with the sellers the price charged the British government above the actual cost. He demanded the appointment of a com-

mittee of inquiry.

Lord Stanley, financial secretary of the foreign office, said an inquiry would be made and he believed the accusa-tions of corruption brought against British officers would be disproved. Mr. Broderick, the war secretary, said the war office paid for horses in England £42, in Canada £30, and in Australia, the United States and Hungary £20 to £25. Later in the discussion Mr. Broderick said a telegram had just reached him from Lord Kitchener an nouncing that between 50,000 and 60 000 troops were now suitably mounted. The

## THE VERMILLION MINE.

Title to it Will Soon be Passed Upon by the United States Supreme Court.

Bichest Bessemer Ore Mine Known-U. S. Steel Company Ready to Give Eight Millions.

New York, June 7 .- The Herald says: Eight million dollars in cash and possibly a much larger sum in profits, which are now only prospective, hang upon the United States Supreme Court's disposition of a title to a tract of land known as "section 30" in the famous Vermillion range in northern Minneso

ta. This suit after long litigation, has now been brought to a final issue before the tribunal of last resort. Argument has been ordered for October. The case involves a tract which is generaly believed to contain the richest deposits of Bessemer iron ore in the world. It is so valuable that the United States Steel company stands ready to pay \$8,000,000 for the rights

which will be awarded to the victor in the long struggle for ownership. Of all who have hoped to draw riches from the mine since its discovery only two interests have survived the win-nowing process of the law. One of the contestants is the discoverer, a man who is practically without a dollar in the world. The other is A. N. Miller who built the Savoy hotel in this city and who held a controlling interest in it until he sold it to Judge Dugro of the New York supreme court. Mr. Miller is accounted a wealthy man.

Frank Eaton, a wandering prospector in 1884, located the section under serip issued by the government of Orillie Stram, a half-breed Sioux Indian wo-She subsequently gave a deed of the section to Eaton. Examination of the claim showed an outcrop of an exceedingly high grade iron ore extending for a mile and estimated to be worth

from \$5,000,000 to \$10,000,000. This discovery caused keen competition for the property and Eaton's title was subjected to close scrutiny. Various interests sought to acquire it and in 1889 the Midway company, which is controlled by Mr. Miller, obtained title from the secretary of the interior through Frank Hicks, on the ground Eaton's location was illega Other claims were made, but the Midway company defeated them all, taking case twice to the United States

Supreme Court. Finally Eaton re-mained the only obstacle to its com-plete control and it began proceedings to have this title, founded on the half breed woman's scrip, declared void.

Judge Samuel H. Moer, of the Eleventh judicial district, who is now a member of the law firm of Moer and Edson, of this city, heard the case and much to the surprise of the Midway company, decided in favor of Eaton. This case was taken to the highest court in Minnesota, which sustained Judge Moer. It has now been carried to the Supreme Court of the United States. Though the surface indications point to the conclusion that the mine is one of the richest in the country not a cent has been expended in working it, while thousands of dollars have been paid in litigation. It is looked upon by ex-perts as the best property in the range which has been made famous by the Chandler, the Soudan, the Tower and the Elymnes. The Vermillion mines are chiefly owned by the Minnesota Iron company in which J. L. Great-singer, now president of the Brooklyn

Rapid Transit company, was formerly In the Mesaba range about thirty miles away are the Rockefeller iron mines which have already been acquired by the United States Steel corporation. Eaton, whose title hitherto has been upheld, and who will be raised from poverty to wealth, should the decisions stand which have been given, lives in Duluth. There is widespread interest among iron men in the final judgment.

OPPOSED TO TARIFF DISCUSSION Rep. Tayler of Ohio Says it Would Have a Damaging Effect.

Washington, June 6 .- The industrial ommission at its session today considered the tariff question with inci-dental reference to trusts, the wit-nesses being Congressmen Robert W. Tayler of Ohio, and George R. Gunton, president of the New York I titute of Social Economics.

Mr. Tayler took the position that any discussion in Congress of the tariff at this time would have a damaging effect upon the country. He said the Dingley law was the most equitable tariff law the United States had ever had. He took a decided position against trusts and said they were not

fostered by the protective tariff. Mr. Tayler also said that he believed in the principle of reciprocity, but that he did not indorse any of the recently

negotiated reciprocity treaties.

Mr. Gunton devoted himself especially to replying to an argument recently made before the commission by Ed-ward Atkinson for freer trade. Mr. Gunton said that the freedom con-tended for by opponents of the tariff is analogous to freedom of the savage, a freedom which, if indulged in too fre-ly, not only brings injury to others, but ruin to himself.

Admiral Schley declined to speak, ut said he would be pleased to shake hands with everybody if he would be allowed to go. This caused more cheering, and when it subsided some one shouted: "What's the matter with Sampson?"

The admiral replied: "Nothing; he is a gallant officer and a good man. This was greeted with more cheering, and the uproar became so great that some one jokingly telephoned to the police station that a riot was in progress in the maritime exchange, The police escorted the admiral, who was laughing by this time, to safety, but only after he had shaken hands all

# MILITARY POWER WILL BE SUPREME

Over the Philippine Civil Government.

TO BE ESTABLISHED SOON.

Judge Taft and General Chaffee Will Collaborate Admirably - Latter and MacArthur Confer.

Washington, June 6.- The new civil government to be established in the Philippines is receiving the consideration of the President and the secretary of war. It will differ little from what was first outlined as there will be a governor for the archipelago and legislative council and other officers. This government will have control of all civil affairs, but it will be under the war power to the extent of being directed by the secretary of war.

There will be a nice distinction as to the authority of the general commanding the troops in the Philippines and the governor to be appointed under the civil government. No official declaration has been made as to which will be the supreme authority, but it is known that the secretary of war will be su-

#### CHAFFEE AND M'ARTHUR.

Manila, June 6.—Gen, Chaffee was ace today, where a private conference between Gens. Chaffee and MacArthur took place. Gen. Chaffee informed the correspondent of the Associated Press that while he was not sure of orient's general capacity for self-gov-ernment he favored the establishment of civil control in the Philippines at the earliest practicable moment. He was full of sympathy with the commission's plan for native education and business advancement because the United States interests and native interests lie in the same line. It seems certain that under a plain division of the civil and military authority, Judge Taft and Gen. Chaffee will collaborate admirably.

The fragmentary news received here of the Porto Rican decisions has caused apprehension that there will be such a deficit in the Philippines revenues that Congress will need to make an appropriation to meet it. Fears are also expressed as to the re-

sult of the application of jury trials and other features of the constitution not Capt. Algalongo and his aide have been killed by Wray's command at Dousol, Aibay province.

## THE KLONDIKE CLEAN-UP.

Millions of Dollars' Worth of Cold Dust Coming to Dawson City.

First Shipmen's for Outside Will Not Start for Some Weeks, Until Boats Are Regular.

Dawson, May 21, via Seattle, Washington, June 6 .- The spring cleanup season is in full swing in all parts of the Klondike camp. Millions of dollars' worth of precious dust have been washed from the mountain-like lumps of pay dirt that were taken out by the army of totiling miners through the long, weary winter months, Within a month \$3,000,000 or \$4,000,000 more will have been taken out, and the washing of the winter dumps will then be finished. The spring clean-up of the camp is estimated at \$15,000,000, and the summer output at \$10,000,000.

The dust is now coming into Dawson at the rate of \$30,000 to \$40,000 a day. After two or three weeks the roads will be drier and it will flow in at a heavier rate. The two banks here are busier than they have been for months buying or receiving the dust for storage. The big trading companies are receiving a great deal of dust in payment for goods advanced to miners during the winter. The camp is in a flourishing condition, and everywhere good feeling prevails.

The first shipments of dust to the outside of any consequence will perhaps not start for a week or two, or until the river is at a more steady stage and the boats run more regularly. However, there will be a rush of people out by the very first boats, and all will carry more or less of the precious
